## SUMMARY

Final-year B.Tech Computer Science student at Vishwakarma Institute of Technology, Pune, targeting AI/ML and data roles. Built and shipped two production-facing projects.

## EDUCATION

- B.Tech Computer Science, Vishwakarma Institute of Technology, Pune — CGPA 8.6/10, expected 2027
- Higher Secondary, Fergusson College, Pune — 92.4%

## EXPERIENCE

- Data Intern, Pune Data Collective — built a churn-prediction model in Python with scikit-learn, improving recall from 0.61 to 0.74 on a 40k-row dataset
- Data Intern, Pune Data Collective — wrote SQL reporting queries used weekly by a 4-person team
- Freelance web work — delivered a FastAPI booking backend for a local studio on a single Linux VM

## PROJECTS

- CampusRAG — retrieval-augmented college FAQ assistant using FastAPI, pgvector and Python; 300-student pilot
- TransitETA — bus arrival time-series predictor in pandas and Python, 18 percent lower error than baseline
- CourseCart — small React frontend with a SQLite backend for tracking electives

## SKILLS

- Python, SQL, pandas, scikit-learn, numpy, FastAPI, JavaScript, React, PostgreSQL, SQLite, Docker, Git, Linux, statistics, matplotlib, Power BI, Excel, communication

## ACHIEVEMENTS

- Smart India Hackathon finalist, 2025
- Department rank 3 in semester 5

## LANGUAGES

- English, Hindi, Marathi
